About Me

Manufacturing Design Engineer with over 3 years of experience in the automotive and aluminum extrusion industries, specializing in tooling design, process improvement, and operational analysis. Beyond engineering design, I have developed operational reporting systems and analyzed production data to support tooling optimization, production planning, and capacity monitoring. These experiences strengthened my interest in using data to solve operational challenges, leading me to complete the RevoU Full Stack Data Analytics Program and expand my skills in SQL, Python, Tableau, and Power BI. I combine manufacturing expertise with data analysis to identify opportunities for process improvement and support better operational decisions.

Working Experiences

Design Engineer Officer, Acting Dies Supervisor – Aluminium Extrusion | PT. Mega Persada Group **Sep 2024 - Present**

- Designed and delivered 12–15 aluminum extrusion dies per month, achieving approximately 90% production-ready designs with die performance consistently meeting or exceeding production lifetime targets.
- Analyzed manufacturing issues and collaborated with production teams to optimize die performance, contributing to improved tooling reliability throughout production.
- Prepared engineering drawings and technical documentation that supported accurate fabrication, machining, and production execution.
- Developed a production monitoring dashboard using Microsoft Excel, Pivot Tables, and advanced formulas to centralize weekly production activities, reducing report preparation time to less than 10 minutes after data updates.

Staff Design Engineer - Automotive Parts Manufacture | PT. Sebastian Jaya Metal **May 2023 - Sep 2024**

- Prepared 2–3 detailed stamping die drawings per week to support automotive tooling production schedules.
- Designed complete die assemblies and performed die layout analysis to improve manufacturability and production readiness.
- Collaborated with machining and production teams to ensure accurate tooling fabrication and assembly.
- Supported multiple engineering activities across design, machining, and production, enabling smooth project execution within tight deadlines.

Co-Founder - Student Catering | Katerink Semarang **Jun 2021 - Dec 2022**

- Managed daily operations serving up to 120 customers with approximately IDR 25 million in monthly revenue.
- Evaluated customer demand and promotional activities to support menu planning and business growth.
- Managed purchasing activities and supplier coordination to maintain operational efficiency and inventory availability.
- Monitored daily sales and operational activities to support business planning and customer satisfaction.

Project Experience

Dieshop Production Monitoring Dashboard, PT. Mega Persada Group

Tools: Microsoft Excel, Pivot Tables, Advanced Excel Formulas, Data Cleaning, Data Analysis

- Developed a production monitoring dashboard by consolidating production data from multiple operational sources into a standardized reporting system.
- Cleaned and transformed datasets with different structures to enable automated monitoring of production activities, machine utilization, and operator workload.
- Reduced weekly report preparation time to less than 10 minutes, improving operational visibility and supporting production planning.

Supply Chain Delivery Performance Analysis, RevoU

Tools: Microsoft Excel, Tableau

- Analyzed shipping performance data using Excel to identify key drivers of late deliveries across the supply chain.
- Performed exploratory data analysis (EDA) to evaluate delivery trends and operational bottlenecks.
- Recommended improvements to support SLA compliance and logistics efficiency through Tableau dashboards and analytical insights.

Customer Segmentation using RFM Analysis, RevoU

Tools: Python (Pandas, Matplotlib, Seaborn), Power BI

- Performed RFM analysis using Python to identify customer purchasing behaviour and high-value customer segments.
- Developed interactive Power BI dashboards to visualize customer segmentation and business insights.
- Proposed retention and revenue growth strategies based on customer segmentation findings.

Education

Diponegoro University Bachelor of Engineering in Naval Architect GPA: 3.53/4.00	Aug 2017 - Sep 2022
RevoU - Full Stack Data Analyst Program Data Analyst	Feb 2026 - Jun 2026

Skills

Data Analytics: SQL, Python (Pandas, NumPy, Matplotlib), Tableau, Microsoft Excel, Data Cleaning, Data Visualization, Exploratory Data Analysis (EDA) **Engineering:** SolidWorks, AutoCAD, CATIA, GD&T, Manufacturing Process, Process Improvement, Root Cause Analysis **Soft Skills:** Analytical Thinking, Operational Analysis, Detail-Oriented, Team Collaboration, Technical Communication
